

Wormco Liquid Fertiliser is a unique, concentrated organic liquid fertiliser excreted by worms in the vermicomposting process. This specialised fertiliser helps create healthier soil and increases microbe levels, which in-turn produces stronger, greater yielding, healthier plants.

Wormco Liquid Fertiliser

The key to this concentrate is the worm's food source, which contains a nutrient blend of organic plant and ocean sources with crushed minerals, seaweed, fish, lime, rock phosphate, and other natural nutrients, which ultimately convert to a powerful & microbe-rich plant food.

Application rates

For general applications via a sprayer, seed inoculant, liquid injection or drip systems combine 5L (5%) of Wormco Liquid Fertiliser with 95L (95%) water.

For crops, apply Wormco Liquid Fertiliser at germination and growth stages and support with Worm Hit Pellets for optimum results. For pasture and lawns, apply Wormco Liquid Fertiliser at seasonal changes, or when fertilisation is required.

Order quantities

Wormco Liquid Fertiliser is available for sale in:

1000L bulk (IBC) and 25L drums

**The full range from Wormco:
Pellets, Bricks, Fines & Liquid**

Our Commitment

Wormco is committed to a better world through better farming, better returns for the farmer, better produce and a healthier society with organic worm casting enriched fertilisers.

Crop Suitability

Wormco Liquid Fertiliser is suitable for use on all commercial crops, vines, and trees, as well as wholesale produced plants, domestic crops and non-food bearing plants.

The liquid is generally applied during the plant's growth phase, through either drip fed irrigation, fertigation, or spray irrigation / foliage spray at a guide of 5-10% concentration.

Wormco Liquid Fertiliser is suitable for use on:

- Grains crops including; Wheat, Oats, Rye and more
- Corn, Rice, Grasses and Pasture
- Vegetables and other fruit
- Sugarcane
- Grapes (table and wine grapes)
- Fruit trees including; Avocados, Citrus, Stone Fruit, Drupes, Nuts and more (Worm Hit Bricks offer excellent benefit to new tree plantings)

Typical analysis

TOTAL NITROGEN	492 mg/kg
TOTAL PHOSPHORUS	130 mg/kg
TOTAL POTASSIUM	700 mg/kg
TOTAL SODIUM	84 mg/kg
TOTAL CALCIUM	118 mg/kg
TOTAL MAGNESIUM	7.1 mg/kg
